to understand the certification process.

Certification is obtained via a specific application and approval process.

Only individuals with written permission may sit for the exam.

Any individual may attend the Review Course.

WHO IS THIS COURSE FOR?

QSP designated employees and any person seeking information in the areas of BMP Installations for Stormwater, the Construction General Permit, Erosion Control, Vegetation Establishment, etc. The Presentation Modules include:

**NPDES RULES AND REGULATIONS
PRINCIPLES OF EROSION AND SEDIMENT CONTROL**

**BMPs for
EROSION AND SEDIMENT CONTROL
NON-STORMWATER
MATERIAL AND WASTE MANAGEMENT**

**PLANS AND SPECIFICATIONS
ESTABLISHING VEGETATION
HYDRAULICALLY APPLIED BMPs**

The Presentation Modules review material contained in the Study Guide and the EnviroTech NPDES examination.

PURPOSE OF PROGRAM

The public demands evidence of professional competence from people whose activities affect the natural resources of the world and thereby affect the health, safety and economic security of others. Environmental laws create a need for the services of professionals trained in proper erosion and sediment control and water quality protection. Such professionals increasingly must be able to show evidence of their qualifications.

A certification program is in the public interest and the intent of the EnviroTech NPDES Program is to provide a standardized process for the certification of qualified individuals. The program requires both technical knowledge and hands-on experience in applying erosion and sediment control products and materials.

TIME

Review Course:

8AM-5PM 9/7

Lunch on your own

Exam:

8:00-10:30AM 9/9

COURSE LOCATION
